2008 APSS Program at KAIST, South Korea

Through this 3 week program of coursework, lectures, labs, and site visits, civil engineering graduate students will learn about smart structures technology in an interactive setting. The curriculum will address the hardware, software, data informatics, and applications of smart structures technology. Laboratory experiences and site visits will extend knowledge beyond the classroom, providing students with practical, first hand experience.

Students from the US, Korea, Japan, and China will participate in this program, funded by NSF, KOSEF, JST, NNSFC, and SISTeC, respectively. Students are expected to gain valuable experience of global engagement through emersion in a culturally rich learning environment.
